PARK CITY STILL FULL OF CHANCES

the Investor Despite Great Output.

CAMP HAS SEVERAL MILLIONAIRES TO CREDIT

Old-Time Producers Being Reopened and Will Join Dividend-Payers.

The Park City Commercial club has issued a booklet on the mines of the camp, the same being written by Henry Walsh. The history of the camp is given, also the conditions surrounding the big producers of the district. The camp has produced over \$118,750,000 as follows since ore was first found in the

camp:	
Ontario	
Daly West	9,250,000
Anchor and Daly Judge	13,000,000
Crescent	7,090,000
Silver King	30,000,000
McHenry Quincy	1,000,000
Kearns-Keith	1,500,000
Total	\$118,750,000

After setting forth the prominer part played in the affairs of the stat and west by former Park City men, me who have made their millions wit which Salt Lake City was largely but up to its present splendid condition the book says:

Some examples of the cost of placing mines upon a paying basis here may

mines upon a paying basis here ma not be out of place, but bear in min that we do not claim that our state ments are exactly correct in dollar and cents in the stated sums whice we give, as we base them wholly upo-estimates.

The early development of the Da West mine cost in the neighborhood of \$250,000,000 before ore which placed upon a paying basis was cut on the 90 foot level. This property has sinc paid something like \$7000 profits, an is still in a position to pay dividend for a series of years.

The Quincy mine, which is now a part of the Daly West property, wa developed by a few men who took a lease and bond upon the property, capitalized it with their own money to \$40,000, and before the end of two year.

\$40,000, and before the end of two years succeeded in making more than \$3,000,000 through its production and sale.

The great Daly Judge property was closed down and bonded for \$300,000 and developments intelligently and persistently pursued for one year. This property then resumed active production, paid back its bond money and nearly \$500,000 in dividends during the following year.

nearly \$500,000 in dividends during the following year.

The great Silver King, now known as the Silver King Coalition Mines company, was purchased under lease and bond by the men who at present are the controlling factors in this great property. Their first undertaking consisted of putting down a vertical shaft of more than 700 feet in depth and drifting from the bottom of this shaft some distance in the direction of where drifting from the hottom of this shaft some distance in the direction of where they believed the ore existed. They were fortunate in having their judgment verified by cutting the ore, and from the very day on which the ore was encountered this famous property has been a continuous and a great profit maker. For a series of years it paid \$1,300,000 per annum in dividends, and it is today said to have greater bodies of high grade ore blocked out than at any other period of its history.

The condition just described is a usual one with the mines of this district. As a further example of ore

trict. As a further example of ore permanency, the Ontario after producing more than \$40,000,000 still has plenty of ore on its lower levels and its management is busily engaged in making preparations to again place this us ald property on the dividend Its works are the deepest in this jet; the lower levels being more district; the lower levels being more than 2000 feet, and at this depth its ore bodies are said to be strong, large and regular. We cite the above for the purpose of showing to our readers the permanency of our ore deposits.

permanency of our ore deposits.

Many embryonic bonanzas are known to exist in our district, but the owners of these are not possessed of the necessary means to push the developments of such properties to the point of profitable production, yet it seems hardly probable that such condition will long obtain in a district with a larger percentage of successful mining and actions. centage of successful mining undertak-ings to its credit and with fewer failures in mining enterprises to mar its record, than any other great camp in this western country.

They are strictly all wool, well nade and as good as Main street houses sell at \$4.00 to \$5.00; ages up to 16; plain and knickrbocker pants; our price-

\$3.00

WATCHES are warranted to keep good time, have stem wind and stem set, and will run accurately thirty hours, and are given absolutely free with every boy's \$3 00 suit.

Fine Engraving

Our fine work is "telling the story." ome do not yet know that we do his work in our own shop, and so take beir work to other stationers, who send away to be done.

Our work is better. Why not insist n the work being done in Salt Laker bring it to us direct? Why not pull for Salt Lake?
